

FOR IMMEDIATE RELEASE

Arajjet Airline to fly with TRAX eMRO

MIAMI, February 21, 2022 – Despite the ongoing Covid pandemic worldwide, startup airlines continue to launch. Dominican Republic aviation regulatory authorities (JAC) have recently approved 30 routes for the newly rebranded Arajjet Airline, formerly Flycana, as the country's first ultra low-cost carrier. Arajjet will operate scheduled and non-scheduled passenger and cargo service with a fleet of five Boeing 737 MAX 8 aircraft. The company has already taken delivery and released a photo of its first B737 which displays a colorful and distinctive livery. The aircraft was named Pico Duarte after the country's highest mountain and nature reserve.

Arajjet is set to begin operations at its hub based at the Las Américas International Airport (SDQ) in Santo Domingo, the second busiest airport in the Dominican Republic. Routes will include international flights to the United States, Cuba, Colombia, Costa Rica, Mexico, Panama, Peru, Haiti, Trinidad and Tobago, Netherlands (Netherlands Antilles), and France (French Caribbean Antilles).

The airline has inked a deal with TRAX to implement the web-based eMRO system to manage maintenance activities on its Boeing fleet of aircraft. Implementing the eMRO cloud solution with its leading-edge technology will bring many advantages to Arajjet. Users can have maximum mobility while accessing required documentation and electronic data, viewing assigned maintenance tasks, receiving real-time updates on planned and completed work, tapping into integrated materials modules, and an overall increase in cost savings, enhanced productivity, and efficiency.

###

About TRAX: TRAX provides comprehensive software solutions designed to manage all aspects of aircraft maintenance. TRAX is the premium provider of aviation maintenance mobile and cloud products in the global market today. TRAX products support digital signatures, paperless 'Covid-safe' working including Workpacks and manuals, RFID-capability for logistics, Biometric security, offline capability for its suite of mobile apps, web-based applications, and the ability for users to work anywhere with easy access to real-time information.
